Re: Hazardous Waste Facility Permit
EPA I.D. Number KSD000203638

Dear Mr. Prouty:

This letter is to notify you that a final decision has been made to modify the hazardous waste storage permit for your facility located at 3155 Fiberglass Road in Kansas City, Kansas. Your copy of the permit is enclosed and Attachments II and VI. No changes were made to the draft modified permit and attachments.

As you are aware, Kansas received final authorization to implement all portions of the RCRA program, except for those portions covered by the 1984 Hazardous and Solid Waste Amendments (HSWA). The permit modifications requested were not covered by HSWA. As a result, this final decision is being made solely by the Kansas Department of Health and Environment (KDHE). The decision is based on the belief that the information submitted in your facility's modified permit application is accurate and that the facility will be operated as specified in the modified application. All applicable requirements of 40 CFR Parts 260 through 264, 270 and 124 must be complied with, whether or not the requirements are explicitly stated in the modified permit.

No comments were received during the public comment period from December 18, 1987 to February 1, 1988 nor was a public hearing held. Therefore the permit cannot be appealed by the procedures outlined in 40 CFR 124.19. The modified permit will become effective on February 15, 1988.

Sincerely yours,

Dennis R. Murphey, Director
Bureau of Waste Management
